TRB Task Force on Transit Safety and Security (AP018T)

The **TRB Task Force on Transit Safety and Security** focuses on the research, methods, practices, data and technologies important to the topic of public transportation system safety and security as they affect all modes and phases of infrastructure development and service operation. Specific activities and products of the Task Force include:

- Develop and disseminate a database of research needs
- Promote research designed to advance transit safety and security in appropriate research programs both internal and external to TRB
- Participate in research initiatives on transit safety and security
- Develop targeted Calls for Papers, annual meeting workshops and podium sessions
- Develop strategies for maintaining long-term focus on information exchange on public transportation safety and security within the transportation industry
